

Anti-GST Tag Antibody Sepharose Purification Kit

Catalog Number	LDG0008RD
Package	5 rxn / 10 rxn / Customized package

Overview

Description

Affinity purified anti-GST antibodies, developed in mouse, were conjugated to NHS-sepharose. It is an efficient technique for isolating recombinant proteins or other proteins. The GST epitope system relies on a total 211 amino acids long recombinant antibody, which is able to react with N- and C- terminal GST-tagged fusion proteins and may be used for the immunoprecipitation or immune affinity purification.

The purified antibody is immobilized at 3-5 mg antibody per mL of 50% slurry and this kit allows a rapid and efficient affinity purification of active GST fusion proteins. The affinity resin allows an efficient binding of GST fusion proteins without the need for preliminary steps and calibrations. The affinity bound GST fusion proteins can be efficiently eluted from the resin by acid condition. The eluted proteins can be used for characteristic analysis.

Product Note

The optimal protein concentration of the cell lysate should be determined by the end user.

Specifications

Host

Mouse

Clonality

Monoclonal

Application

Immunoprecipitation, Immunoaffinity Purification

Conjugation

Sepharose

Specificity

Recognizes GST tag on either the N- or C-terminus of the recombinant fusion protein.

Sample Type

Cell lysate

Binding capacity

The binding and elution capacity of 1 mL Mouse anti-GST tag mAb sepharose are commonly more than 1 mg of GST fusion proteins.

Instruction**Shipping**

The product is shipped with polar packs. Upon receipt, store it immediately at 2-8°C.

Stability & Storage

This product is stable after storage at:

- 2-8°C for unopened product

Please refer to product manual for storage constructions

Disclaimer : For Research Use or Further Manufacturing Only.
