

# Annexin V-FAM + 7-AAD ApoptosisDetection Reagent

Catalog Number LDG0011RB

Package

100 rxn / Customized package

### Overview

#### Description

Leadgene fluorescent dye (FAM) conjugated Annexin V is highly purified product. During early apoptosis, cells will translocate membrane phosphatidylserine (PS) from the inner face of the membrane to the cell surface. 7-Aminoactinomycin D (7-AAD) is a fluorescent chemical compound with a strong affinity for DNA. It can be used in flow cytometry to evaluate the cell cycle and cell viability during apoptosis. The product can be used in one-step staining procedure without wash step within 20 minutes.

Components

Package	Items	Quantity
	Annexin V-FAM	1 vial (0.5 mL)
100 rxn	7-AAD	1 vial (0.5 mL)
	10× Binding Buffer	3 vials (2 mL)

## **Specifications**

☑ bd@leadgene.com.tw

Reactivity	Application
Mammalian	Cell apoptosis assay
Detection Method	Sample Type
Fluorescent	Adherent cells   Suspension cells

### Instruction

### Shipping

The product is shipped with polar packs. Upon receipt, store it immediately at 2-8°C for long term storage.

### Stability & Storage

This product is stable after storage at:

 2-8°C for 12 months under sterile conditions from date of receipt.

Protect from light.

**Disclaimer :** For Research Use or Further Manufacturing Only.
