# **Overview**

#### **Description**

The HyLink™ Aster594 Conjugation Kit is tailored for conjugating proteins or antibodies with Aster594, a red fluorescent dye known for its exceptional brightness and photostability. This kit supports small-scale labeling (100 µg) with a straightforward protocol, delivering high efficiency and consistent results. Aster594 is ideal for multicolor fluorescence microscopy, flow cytometry, and advanced imaging applications.

### **Components**

Package	ltems	Quantity
	Aster 594	1 vial
100 1	10X Modifier	1 vial
100 μg × 1	10X Quencher	1 vial
	SpinDesalt column	1 vial

# Instruction

### **Shipping**

The product is shipped with polar packs to maintain its stability during transit. Upon receipt, store the SpinDesalt Column at 4°C for optimal performance. All other components should be stored immediately at -20°C or lower for long-term preservation.

### **Stability & Storage**

This product is stable after storage at:

- -20°C or -80°C for 12 months under sterile conditions from date of receipt.
- SpinDesalt Column should be store at 2-8°C.

Equilibrate kit to room temperature before use.

**Disclaimer:** For Research Use or Further Manufacturing Only.
