Overview

Description

Human anti-influenza A virus NP antibody only recognizes nucleocapsid protein (NP) of influenza A viruses but not influenza B viruses. Influenza A viruses are RNA viruses and their subtypes are labeled according to an H number (for the type of hemagglutinin) and an N number (for the type of neuraminidase).

Product Note

Recognize influenza A viruses NP in Lateral Flow and ELISA, when recombinant antibody (LGA7) was paired with human anti-influenza A virus NP antibody, clone LGA4 (cat. LDG0089YA).

Recommended dilution factor:

ELISA: 1:5000-20000

IFA:1: 500-1000

FACS: Assay dependent

Note: Working dilution for specific application should be determined by the investigator to obtain the best conditions.
