## Overview

#### Description

Beta-amyloid (Aβ) is one of the intrinsically disordered proteins (IDPs) involved in Alzheimer's disease (AD) pathogenesis. This peptide derives from the sequential cleavage of a transmembrane glycoprotein, amyloid precursor protein (APP), by beta secretase and gamma secretase. The abnormal metabolism of APP result in excessive accumulation of Aβ, and triggers neurofibrillary tangles, oxidative stress, microglial activation, synaptic dysfunction, synaptic loss and the inflammatory response.

#### **Product Note**

Recommended dilution factor: ELISA: 1:5000-20000 WB:1: 1000-5000

Note: Working dilution for specific application should be determined by the investigator to obtain the best conditions.

Specifications	
Host	Clonality
Mouse	Monoclonal
<b>Isotype</b>	Clone Name
IgG2a	clone 85-1
Immunogen	Reactivity
Human beta-amyloid 1-42	Human

Application	Conjugation
ELISA, WB	Unconjugated
Concentration 1 mg/mL	Storage Buffer Phosphate Buffered Saline containing 0.01% thimerosal, pH 7.4.
Specificity	Form
Beta Amyloid (1-42)	Liquid

# Instruction

#### Shipping

The product is shipped with polar packs. Upon receipt, store it immediately at -20°C or lower for long term storage.

Stability & Storage

This product is stable after storage at:

- 2-8°C for 2 weeks under sterile conditions from date of receipt.
- -20°C or -80°C for 12 months under sterile conditions from date of receipt.

Avoid repeated freeze/thaw cycles. Suggestion: Divide antibody into several vials. Keep only vials for usage at 2-8°C.
