Overview

Description

Beta-amyloid ($A\beta$) is one of the intrinsically disordered proteins (IDPs) involved in Alzheimer's disease (AD) pathogenesis. This peptide derives from the sequential cleavage of a transmembrane glycoprotein, amyloid precursor protein (APP), by beta secretase and gamma secretase. The abnormal metabolism of APP result in excessive accumulation of $A\beta$, and triggers neurofibrillary tangles, oxidative stress, microglial activation, synaptic dysfunction, synaptic loss and the inflammatory response.

Product Note

Recommended dilution factor:

ELISA: 1:5000-20000 WB:1: 1000-5000

Note: Working dilution for specific application should be determined by the investigator to obtain the best conditions.

Specifications		
Host Mouse	Clonality Monoclonal	
Isotype	Clone Name	
lgG2a	clone 85-1	

Tainan Headquarter

Innovation & Research Center

CLD Center

Immunogen

Human beta-amyloid 1-42

Application

ELISA, WB

Concentration

1 mg/mL

Specificity

Beta Amyloid (1-42)

Reactivity

Human

Conjugation

Unconjugated

Storage Buffer

Phosphate Buffered Saline containing 0.01% thimerosal, pH 7.4.

Form

Liquid

Instruction

Shipping

The product is shipped with polar packs. Upon receipt, store it immediately at -20°C or lower for long term storage.

Stability & Storage

This product is stable after storage at:

- 2-8°C for 2 weeks under sterile conditions from date of receipt.
- -20°C or -80°C for 12 months under sterile conditions from date of receipt.

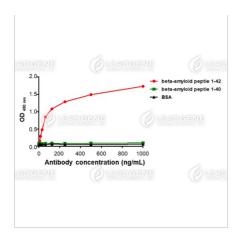

Avoid repeated freeze/thaw cycles.

Suggestion: Divide antibody into several vials.

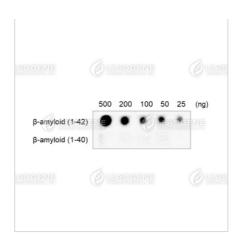

Keep only vials for usage at 2-8°C.
