### Overview

#### Description

Anti-Influenza B virus NP Antibody [clone IB08] only recognizes nucleocapsid protein (NP) of influenza B viruses but not influenza A viruses. Influenza B viruses are RNA viruses and divided into two genetic lineages (B/Yamagata and B/Victoria). Influenza B viruses are not classified by subtype like influenza A viruses.

#### Product Note

Recognize Influenza B virus NP in Lateral Flow, when clone IB08 antibody was paired with Anti-Influenza B virus NP Antibody [clone IB07] (cat. LDG0182YA).

Recommended dilution factor:  
 ELISA: 1:5000-20000

Note: Working dilution for specific application should be determined by the investigator to obtain the best conditions.
