

Human FGF-8a, His Tag, E. coli

Catalog Number LDG073PHE

Package

5 µg / 20 µg / 100 µg / Customized package

For full product information, images and publications, please visit our website.

Specifications

Species of Origin Human	Expression System Escherichia coli
Affinity Tag His Tag (C-term)	Storage Buffer Lyophilized from a 0.2 μm filtered solution of 50 mM Tris, 1 M NaCl, pH 8.5.
Purity >98% as determined by SDS-PAGE analysis.	Molecular weight The protein has a calculated MW of 22.14 kDa. The protein migrates as 23 kDa under reducing condition (SDS-PAGE analysis).
Activity Measure by its ability to induce 3T3 cells proliferation. The ED ₅₀ for this effect is <2 μ g/mL.	Endotoxin Level <0.1 EU per 1 μg of the protein by the LAL method.
Earma	

Form

Lyophilized

Datasheet

Background

Fibroblast Growth Factors-8a (FGF-8a) is a 23.5 kDa member of the fibroblast Growth Factors with 204 amino acid residues. FGF-8 is an important role in the regulation of embryonic development, cell proliferation, cell differentiation and cell migration. In embryogenesis function, FGF8 is necessary in limb, brain, eye and ear formation.

Synonyms

Androgen-induced Growth Factors, AIGF, Heparin-binding Growth Factors 8, HBGF-8, Fibroblast Growth Factors 8

The product is shipped with polar packs. Upon

receipt, store it immediately at -20°C or lower

Sequence Note

Gln52-Arg223

Shipping

for long term storage.

Uniprot ID

#P55075

Instruction

Reconstitution

It is recommended to reconstitute the lyophilized protein in sterile H_2O to a concentration not less than 200 µg/mL and incubate the stock solution for at least 20 min to ensure sufficient redissolved.

Stability & Storage

This product is stable after storage at:

- -20°C for 12 months in lyophilized state from date of receipt.
- -20°C or -80°C for 1 month under sterile conditions after reconstitution.

Avoid repeated freeze/thaw cycles.
