# **Overview**

#### Description

Hepatitis B virus (HBV) is a hepadnavirus which has a circular genome composed of partially double-stranded DNA. The HBV surface protein antigens (HBsAg) are comprised of large (LHBs), middle (MHBs) and small (SHBs, also called major) protein. LHBs contains preS1, prS2, and small protein. MHBs does not include preS1 protein and SHBs dose not include preS1 and preS2 proteins. HbsAg and its antibodies have been developed as biomarkers to monitor infection stage. Expression of preS1 and preS2 in tissue or serum are also important to reveal the mechanism of HBV infection.

**Product Note** 

Recommended dilution factor: ELISA: 1:5000-20000 WB: 1:1000-5000 IFA: 1:500-1000

Note: Working dilution for specific application should be determined by the investigator to obtain the best conditions.

# **Specifications**

Host	Clonality
Mouse	Monoclonal
Isotype	Clone Name
lgG1	clone S201

Immunogen	Reactivity
Hepatitis B virus preS2 protein	Hepatitis B virus
Application	Conjugation
ELISA, WB, IFA	Unconjugated
Concentration	Buffer
1 mg/mL	Phosphate Buffered Saline containing 0.03%
	ProClin 300, pH 7.4.
Specificity	Form
preS2 protein	Liquid

## Instruction

#### Shipping

The product is shipped with polar packs. Upon receipt, store it immediately at -20°C or lower for long term storage.

#### **Stability & Storage**

This product is stable after storage at:

- 2-8°C for 2 weeks under sterile conditions from date of receipt.
- -20°C or -80°C for 12 months under sterile conditions from date of receipt.

Avoid repeated freeze/thaw cycles. Suggestion: Divide antibody into several vials. Keep only vials for usage at 2-8°C.
