

## Anti-DENV E IgM Antibody

**Catalog Number** LDG0205YA

**Package** 100 µg / Customized package

For full product information, images and publications, please visit [our website](#).

### Overview

#### Description

Dengue virus belongs to the family Flaviviridae, genus Flavivirus and consists of four distinct serotypes (DENV1 to 4). Dengue virus is transmitted by mosquitos majorly of species Aedes aegypti and Aedes Albopictus that widespread around tropics and subtropics. The Envelope protein is the major surface-exposed antigen and the primary target of the humoral immune response, and thus the focus of vaccine design.

### Specifications

#### Clonality

Recombinant Human IgM

#### Application

ELISA, LFA

#### Concentration

Lot-dependent, please refer to product label.

#### Specificity

E (envelope) protein

#### Reactivity

Dengue virus E protein 1-100 a.a.

#### Conjugation

Unconjugated

#### Buffer

Phosphate Buffered Saline containing 0.03% Proclin 300, pH 7.4.

#### Form

Liquid

### Instruction
