

# Anti-EV-A71 VP1 IgM Antibody

Catalog Number LDG0207YA

Package

100 µg / Customized package

For full product information, images and publications, please visit our website.

## **Specifications**

<b>Clonality</b>	Immunogen
Recombinant Human IgM	EV-A71 VP1
Reactivity	Application
EV-A71	ELISA, LFA
<b>Conjugation</b>	<b>Concentration</b>
Unconjugated	Lot-dependent, please refer to product label.
<b>Buffer</b> Phosphate Buffered Saline containing 0.03% Proclin 300, pH 7.4.	<b>Form</b> Liquid

#### Background

Enterovirus A71 (EV-A71), a positive-strand RNA virus of the Picornaviridae family, is a persisting global concern. EV-A71 is primarily transmitted through the fecal-oral route, causing hand, foot, and mouth disease (HFMD), severe central nervous system complications, neural damage, and even life-threatening. VP1 is a structural capsid protein consisting of 297 amino acids, promoting infection by binding to specific receptors on the surface of host cells, including Pselectin glycoprotein ligand 1 (PSGL-1), scavenger receptor B2 (SCARB2), annexin II protein, sialylated glycan, and heparan sulfate.

## Instruction

#### Shipping

The product is shipped with polar packs. Upon receipt, store it immediately at 2-8°C for long term storage.

#### **Stability & Storage**

This product is stable after storage at:

 2-8°C for 6 months under sterile conditions from date of receipt.

Briefly centrifuge vials before opening.
