Background

C-X-C motif chemokine 1 (CXCL1) also named Growth-regulated oncogene alpha (GRO α), which is a chemokine of the intercrine alpha family. CXCL1 is a 7.9 kDa protein containing 73 amino acid residues. CXCL1 is expressed in immune cells such as macrophage and neutrophils. CXCL1 plays an important role with immune responses and cancer progression. CXCL1 activates the cell signal transduction with casepas1 that affect the cell proliferation, differentiation and migration.
